    o Computer Science
    o Email – tranjt@mail.uc.edu
    o Cell – (513) 704-9561
    o Role – Frontend / Database / Client-side Developer

About:

Internal Home Directory is an easy-to-use home inventory management system whose purpose is to prevent waste and make organizing seamless in the common household. Its core use is to act as a visualization of an inventory or check list. Its notable features will include automation in creating and editing entries in its database. The inventory management system will help users determine what they already gave and encourage them to make use of their items. Future functionality may include the ability of users to scan documents such as receipts or QR codes to automatically update the existing inventory. The hope is to gamify interactions with this application, so users find themselves using it seamlessly.

General Schedule / Team Communication:

- All members will be accessible or available on online messaging apps (such as Discord or Outlook)
- Members will meet at least once a week at the end of the week
    o Aiming for Fridays most weeks
    o 30 minute meetings
